

Visitor protocol at 27Cluver

27Cluver understands that residents' do have a need to have a visitor(s) staying overnight from time to time. However, it is important that the presence of visitors does not present a security risk or inconvenience to other residents and that the granting of consent is properly controlled.

No visitor will be allowed to stay overnight in 27Cluver other than in accordance with these rules.

Residents remain responsible for the behavior of their visitors at all times.

Who can give consent?

1. Only Management at the 27Cluver can give permission for overnight visitors. Consent is discretionary and allowing a visitor to stay overnight in 27Cluver is a privilege not a right.
2. Residents must notify the 27Cluver Management of all overnight visitors – This can be done by submitting an email to info@27cluver.co.za. Email must include the visitors' name, affiliation with the resident and length of stay at 27Cluver.

How long can they stay and how many visitors are allowed?

1. A resident can have a maximum of **one** overnight visitor per night. This is limited to **one night during the week**; on weekends visitors are permitted to stay for two nights.
2. There are strictly **NO VISITORS** allowed on Varsity Cup nights.
3. If a resident should want a visitor/family member to stay for longer than the allowed time, the request should be addressed to the 27Cluver Management, info@27cluver.co.za, where a decision will be made based on the merits in each case.
4. Visitors may only be permitted if there is a bed available for the visitor.

Can the same person have frequent visitors?

1. There is a limit on the frequency of visitors to one visitor per month. However, the system relies on residents not to abuse the visitor privilege and not to allow non-residents to stay in 27Cluver on a regular basis. The granting of consent remains in the discretion of Management granting the consent.
2. The privilege is meant for bona fide visitors and Management will monitor the requests made by any one 27Cluver resident over time in order to prevent abuse.
